## Resetting Panasonic Camera by Hardware: >>

Resetting to the Factory Default Settings using the Reset/WPS button:

- Connect the camera to the power cable.
- To perform factory reset, keep the camera connected to the power cable (it doesn't matter if the camera is connected with the LAN cable or not).
- Then keep the "Reset/WPS" button pressed until both lights on the camera are off. (You can find the reset button at the bottom left of the back of the camera)
- Now your Cloud Camera is reset to factory defaults.
